NOVEMBER 2022

October was Pharmacy Month
October was busy with American Pharmacists Month, National Pharmacy Week (Oct. 16-22), and Women in Pharmacy Day (Oct. 12). All are important ways to recognize the impact pharmacists make on their patient's lives and increase awareness of the vital role pharmacists play as part of the healthcare team. Pharmacists are often the unrecognized heroes in detecting and preventing adverse drug events before a drug even reaches a patient. We are thankful for our team, and the impact they have in educating future pharmacists, the impact they make on drug therapy at the individual level, and the impact they make on influencing population health.
